

PER-T Chemical Dosing pump/timer

- Regular timed dosing of chemicals
- Programmable weekly/daily dosing
- Power supply: 240Vac 50/60Hz
- Optional 110Vac available
- Self priming action without valves
- Easy replacement of roller & tube
- Robust ABS case
- Wall or foot mounting (by mounting brackets)
- Complete installation kit – Foot filter, injection fitting, dosing tube & wall mounting bracket with screws

The PER-T chemical dosing pump is a self-contained timer and dosing pump mounted in a rugged ABS case. This cost effective doser is suitable where regular, timed, volumetric dosing of chemicals is required.

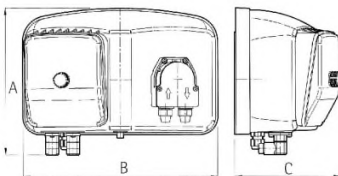

Technical Characteristics

Oder code		AD052V401
Case		ABS Plastic
Voltage		3 W, 230Vac (110v special order)
Pump	Flow rate Max Pressure Tube Material	2.4 litres per hour 1 Bar Santaprene
Timer	Display Intervals	LCD 16 on/off events giving 8 timed sequences Each individually programmable as: Daily, Weekly, Mon to Fri, Sat & Sun

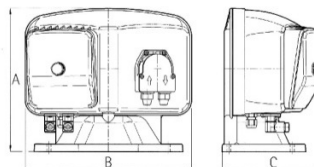

NOTE: for horizontal mounting version which requires a bracket, add the code ADBAS300

Materials used in construction of this equipment are suitable for use with the majority of chemicals in use. However, some chemicals such as alcohol or chlorine based products may require that the pump or delivery tube is selected accordingly. These pumps are intended for low pressure applications and therefore not suitable to dosing into pipelines, or where the fluid must be pumped to a great height.
